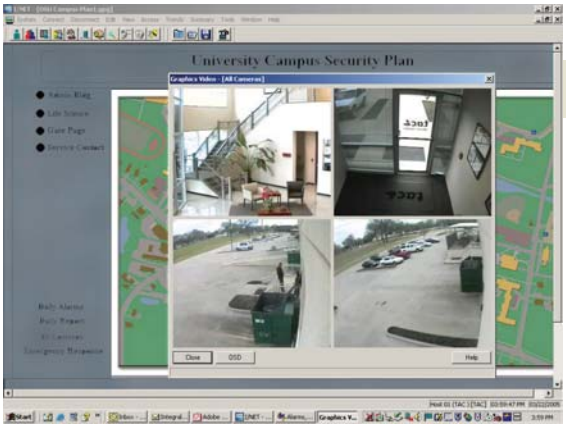
i/net seven

Digital CCTV is an Integral Part of Your Security

Revolutionize the way you monitor, analyze, and archive surveillance video with I/NET Seven's integrated control of digital video management systems from Integral Technologies.

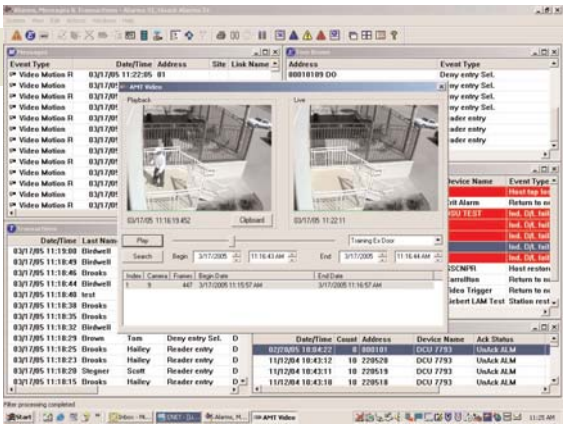


Be Secure

I/NET Seven® is a powerful and reliable security solution, with features that make your systems easy to install, operate, integrate, expand and maintain - throughout the life of your facility. No other security product gives you the power of I/NET Seven backed by the leadership and reputation of Tour Andover Controls.

Point, Click and View

I/NET Seven's integrated control of Integral Technologies' Digital Video Management Systems (DVMS) provides a centralized video monitoring, administration and reporting system. One simple interface – easy to use – simplifies operator training and reduces your overall cost of ownership. Just point, click and view to manage complex digital video architectures, configure recording of event alarms, and view stored or live video directly from I/NET Seven's alarm management interface. Remote access to the system allows operators to manage the system from any PC or mobile device such as a PDA or cell phone. I/NET Seven and Integral Technologies together increase the overall security of your facility.



I/NET Seven and Digital Video Management Integration Features:

- Freedom of choice in cameras
- Support for IP or standard analog DVMS products
- Intelligent motion detection
- Dynamic, event-driven display of graphical facility maps
- Adjustable recording rates for time-lapse recording mode & event recording mode
- Video clip export to industry standard format for easy archiving, off-site viewing or email
- View live and recorded video simultaneously
- Maintain and archive video information to a central location on a network, without physically interacting with every video recorder in the enterprise
- Automatic pop-up of video on alarm
- View live video from cameras represented by rotatable icons on graphical layouts
- Certified for Microsoft Windows 2000 and XP Professional
- Support for multiple PC monitors
- Integrated Pan Tilt Zoom (PTZ) camera control
